Accepted 12 December, 2013

The authors, Yusuf A. Z., Zakir A., Shemau Z., Abdullahi M., Halima S. A. Abubakar U., Sani Kassim and Nuhu Mohammed, have requested the retraction of their article titled "Visual defects among consumers of processed cassava (gari)" which was published in Vol. 8(1), pp. 25-29, January 2014, DOI: 10.5897/AJFS2013.1093 from the journal's website and publisher's database.

The retraction is based on the fact that a Gari processing company has requested the retraction this paper from journal's website and publisher's database since it is crumbling their business inputs to their competitors leading to a drastic reduction in customers and consumers hence affecting their productivity and profitability.

Yusuf A. Z and all co-authors are deeply sorry for any inconvenience this may have caused to the editorial staff, readers and other researchers.

In an effort to stop the distribution of this publication and the data contained therein, African Journal of Food Science is retracting the article in its entirety with the consent of Yusuf A. Z.
