The editors of the African Journal of Pharmacy and Pharmacology (AJPP) are retracting the article, "**Preparation and characterization of crosslinked and non-crosslinked polycaprolactone fumarate (PCLF) NPs as carriers for doxorubicin HCl**" published in 2011 (Vol. 5(7), pp. 797-805, July 2011). This is based on evidences of text overlap (in figures and tables) between the article and those published in two other journals: International Journal of Pharmaceutical Sciences and Research (Vol. 3(9):3106-3115, 2012) and Daru (Vol. 19(1):12-22; 2011)

Hence, this is a case of redundant publication.
